Innovative Fiber Optic Cleaners

EFFECTIVE

VERSITILE

CLEANING

CONNECTORS

FUSION SPLICE PREPARATION

TERMINATION PROCEDURES

STRIPPED FIBERS

OPTICAL LENSES/COMPONENTS

Krell Technologies' Satwipes® represent a new approach to industry accepted cleaning techniques for optical connectors and components. Satwipes® consist of a cleaning system incorporating multiple presaturated wipers in a resealable and reusable tub. These heavy-weight wipers are lint-free and are cleanroom Class 100 rated for minimal contaminants. They are ideal for cleaning connectors before mating, and wiping fibers before splicing procedures.

Satwipes® eliminate open solvent containers and leaky dispensers. Messy and cumbersome wetting of dry tissue wipers with alcohol is no longer required. There is no need to repetitively tear open individually packaged wipers. Flammability hazards, technician exposure to airborne chemicals and solvent storage problems are also significantly reduced.

Satwipes® are economical to use because they minimize solvent usage and handling time, while offering increased efficiency during cleaning operations. The resealable tub prevents solvent evaporation and potential contamination. Wiper refill packs make the tub reusable. Regardless of field or manufacturing environments, Satwipes® are well suited for critical cleaning requirements.

Specifications Solvent: 100% isopropyl alcohol
Wiper Type: 100% polyester
Wiper Size: 4" x 4.25"
Wipers/Pack: 185

Ordering Information Part No: SWC30063, Case of 12 refill wipers + One Tub
SWC30063T, Case of 12 refill wipers + 12 Tubes

UNIQUE

ERGONOMIC

CLEANING

ONE STEP CLEANING

SELF CONTAINED PACKAGING

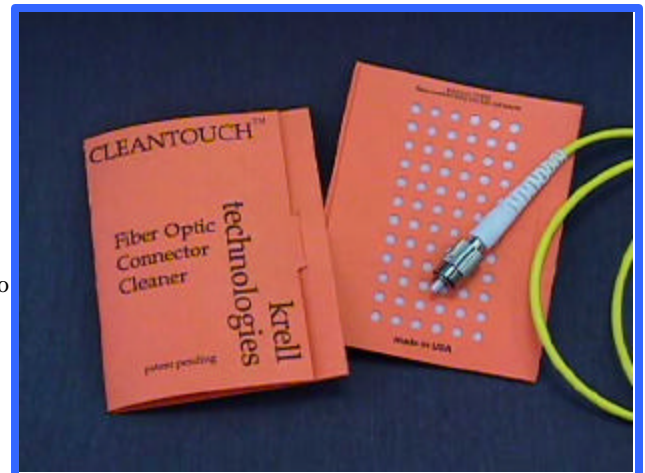

POCKET SIZED

NO SOLVENTS REQUIRED

LOW COST PER CONNECTOR

Krell Technologies' CleanTouch® is a compact and cost effective alternative to standard connector cleaners. A connector or bare fiber is simply touched against a cleaning port that removes all contaminants. This single step process causes all contaminants such as dirt and dust to remain on CleanTouch™. No solvents, compressed air or costly dispensers are required.

The simplicity of CleanTouch™ will ensure its use in the field where cleaning is often neglected due to time consuming and cumbersome traditional methods. CleanTouch™'s ergonomic operation guarantees field acceptance and widespread deployment at a low cost.
